

Temperature probe Pt1000TG68/M, MiniDin connector, cable 2 meters

code: SN232M

Multi-purpose watertight IP68 probe -50 to +200°C.

The probe is designed to measure the temperature of gaseous and liquid substances.

The maximum temperature range of use of the sensors is -50 to 200 $^{\circ}$ C. Used type of lead-in cable has silicone insulation and shielding.

The probe meet the ingress protection of IP 68 (1 bar) in accordance with EN 60~529 and is designed for measuring the temperature below the surface of water for continuous immersion at a depth of up to 5~m.

The method of use must be chosen with regard to the temperature and chemical resistance of the case and supply cable.
