## Datalogging thermometer with display

code: S0110

Temperature data logger is designed for record of temperature. Values are stored to a non volatile electronic memory. Data transfer to the personal computer for further analysis is performed via USB, RS232, GSM or Ethernet interface by means of a proper adapter.
The device includes Traceable calibration certificate with declared metrological traceability of etalons is based on requirements of EN ISO/IEC 17025 standard.

For communication with the PC must be from Optional accessories ordered USB adapter or COM adapter or start/stop magnet if is needed to control logging the other way than directly from computer.

## Technical data

| TEMPERATURE SENSOR |  |
| :--- | :---: |
| Measuring range | -30 to $+70^{\circ} \mathrm{C}$ |
| Accuracy | $\pm 0.4^{\circ} \mathrm{C}$ |
| Resolution | $0.1^{\circ} \mathrm{C}$ |
| GENERAL TECHNICAL DATA | -30 to $+70^{\circ} \mathrm{C}$ |
| Operating temperature | internal temperature sensor |
| Channels | 32,000 values (non-cyclic record) |
| Memory | adjustable from 10 s to 24 h |
| Recording interval | each 10 s |
| Display and alarm refresh | memory<br>cyclic - after filling memory oldest data is |
| overwritten by new |  |$|$| Recording mode |
