

Web Sensor - remote thermometer hygrometer with Ethernet interface

code: T3510

Ambient temperature, relative humidity t-line Web sensor. Remote alarm. Web Sensor with built-in relative humidity and temperature sensors designed as weather sensor.

High precision capacitive polymer sensor ensures excellent long term calibration stability and ultimate accuracy. Dual line LCD is an advantage. Measured values are also converted to other humidity interpretation: dew point temperature, absolute humidity, specific humidity, mixing ratio and specific enthalpy.
