

IoT Wireless Temperature and Relative Humidity Datalogger for external probe, with built-in 2G modem and Flat Rate SIM Card

code: U3121Msim

IoT Wireless Datalogger kit with built-in GSM modem and Flat Rate SIM Card allows the instant connection to the COMET Cloud. IoT Datalogger is designed to record temperature and humidity from external sensors (not included). In case of exceeded set limits e-mail is sent from the [COMET Cloud](#).

Alarms are also indicated locally by LED, LCD and acoustically by built-in beeper.

The recording is performed in a non-volatile electronic memory. The data can be transferred to a PC via included USB-C cable.

GSM recorder **includes Traceable calibration certificate** with declared metrological traceability of etalons is based on requirements of **EN ISO/IEC 17025 standard**.

With a newly purchased IoT wireless datalogger with a built-in modem, you receive 3 months of [COMET Cloud](#) for free; a full year of operation in [COMET Cloud](#) then requires [1 credit](#).
